I think it would be helpful for High School Paraprofessionals to be able to do more professional development in regards to high school-level students. Most of the professional development opportunities are geared more towards elementary and middle school, and I think the paras for high school could benefit more from age-appropriate training. All information provided thus far has been relevant, current, and very useful!! I have learned a tremendous amount over this school year alone, but I think it could be more beneficial to provide PD for students at the secondary level.
