

## **STUDENT INVOLVEMENT IN DECISION-MAKING**

A primary task of the school is to create a stimulating learning climate that develops active involvement of students in their education and develops a spirit of inquiry. This climate is created when students work together with school staffs in such activities as planning and evaluating school programs.

The School Committee believes that students should:

1. Be encouraged to participate in planning classroom activities and in improving courses of studies;
2. Feel free to express, without fear, his or her own opinions, recognizing that every privilege and right has a corresponding responsibility;
3. Be involved in the planning of assembly programs and school-sponsored forums of interest;
4. Be encouraged to participate in student government organizations that provide students with a voice in school affairs; and
5. Be encouraged to participate in a variety of extra class activities to broaden educational experiences.
