The Massachusetts General Laws, Chapter 71, Section 38Q1/2, requires the adoption and implementation of a District Curriculum Accommodation Plan (DCAP). This plan is intended to guide principals and teachers and support staff in ensuring that all possible efforts have been made to meet student needs in general education classrooms and to support teachers in analyzing and accommodating the wide range of student learning styles and needs that exist in any school. The statute also encourages teacher collaboration and parent involvement. Another statute, Chapter 71, Section 59C (Parent Councils), was amended to include involvement of the Parent Councils in development and evaluation of the DCAP.

The Hull Public Schools’ DCAP was reviewed and revised over a period of several months. The process of review and revision serves as part of the district’s strategic planning process. These revisions are then reviewed by each school’s parent council.

The revised DCAP is disseminated and explained to staff in faculty meetings at the elementary, middle and high school levels. It is shared with the School Committee as well.

Included is an annotated list of the school-based programs as well as the personnel who are available to assist and support classroom teachers in analyzing and accommodating the individual needs of students. In addition, there is a list of sample strategies and other actions from which teachers and collaborating staff may select appropriate concerns about academic progress as well as strategies and interventions intended to resolve social and behavioral issues.

The DCAP describes both formal and informal routes. In some instances, communication between parents and teachers will be effective in identifying issues and agreeing upon strategies to be implemented. In other situations, Student Intervention Teams (SIT) will develop a more formal intervention plan. There is a Student Intervention Team at each building. When a teacher is concerned about a student’s progress, that teacher makes a written referral to the SIT and the SIT follows the procedure outlined in the Student Services Procedural Manual. Again, parent involvement is an important part of the process. Concerns that cannot be resolved by these routes, or where there is a lack of progress, may result in a recommendation for a formal initial evaluation to determine if a disability exists through the special education referral process.

Teachers in Hull are continuously monitoring student progress, looking for opportunities to make accommodations to facilitate learning and fostering understanding. The district is committed to early intervention and addresses learning issues in a timely fashion based on a team approach. The district’s goal in this regard is to meet the needs of every child.
